- We don't have a permission in the new account to change settings.

- We are opening in private browser window and signing in to the Azure portal using the newly created user account. When prompted to update the password, we are changing the password to a secure password of your choosing.

- The creation of the second user.

In the private tab opened, and logged into the user1, we don't have the right to change anything in User settings.

- Task 2: Create Azure AD groups with assigned and dynamic membership.
 - In this task, you will create Azure Active Directory groups with assigned and dynamic membership.
